RE: DOCKET NO. 470 – NTE Connecticut, LLC application for a Certificate of Environmental Compatibility and Public Need for the construction, maintenance, and operation of a 550-megawatt dual-fuel combined cycle electric generating facility and associated electrical interconnection switchyard located at 180 and 189 Lake Road, Killingly, Connecticut.

Dear Ms. Johnston:

The Connecticut Siting Council (Council) is in receipt of your correspondence dated February 24, 2017, a copy of which is enclosed for convenience. Not Another Power Plant (NAPP) requested party status and Connecticut Environmental Protection Act (CEPA) status in the above-referenced matter on September 14, 2016. The Council granted NAPP party status and CEPA status in the above-referenced proceeding on September 29, 2016 with the condition that a list of NAPP members be provided to the Council and the service list for Docket No. 470 no later than October 13, 2016 and that NAPP continue to update the status of its members during the proceedings, and enclosed a copy of the Council's Information Guide to Party and Intervenor Status. The Council's Information Guide to Party and Intervenor Status clearly indicates that pre-filed testimony is the only chance for parties and intervenors to make a statement of position and that oral or written limited appearance statements are reserved for members of the public who are not parties and intervenors in the proceeding. NAPP submitted the list of its members on October 13, 2016, a copy of which is enclosed for convenience. You are listed as a member of NAPP, which was granted party status and CEPA status on September 29, 2016.

Please be advised that pursuant to Connecticut General Statutes §4-177a, Connecticut General Statutes §16-50n(f) and Regulations of Connecticut State Agencies §16-50j-15b, **oral and written limited appearance statements are reserved for members of the public who are not parties or intervenors in the proceeding.** Parties and intervenors to a proceeding, such as NAPP and all of its members, have specific legal rights and obligations while the evidentiary record is open and subject to the proceeding schedule developed by the Council to introduce pre-filed testimony and evidence and conduct cross examination of the applicant and other parties and intervenors, as well as to be cross examined by the applicant, the Council and other parties and intervenors. **A person or entity may not be a party to the proceeding and also submit written limited appearance statements.**

The final deadline for pre-filed testimony in this proceeding was December 8, 2016. The evidentiary record for this matter closed on January 26, 2017. NAPP is a party to this proceeding. Neither NAPP as an entity nor any of its members may also submit written limited appearance statements into the record. Therefore, the February 24, 2017 correspondence from you constitutes extra-record, post-filed testimony for NAPP as it was submitted by a member of a party after the close of the evidentiary record. It will not become part of the record as a written limited appearance statement since it was submitted by a member of a party nor will it become part of the evidentiary record as testimony since the evidentiary record in this matter closed on January 26, 2017.

In the event that the evidentiary record for this matter is reopened and a new schedule for pre-filed testimony is developed, you as a member of NAPP, an entity that has been granted party status and CEPA status, may resubmit your February 24, 2017 correspondence as pre-filed testimony and be subject to cross examination thereon by the applicant, the Council and other parties and intervenors during any subsequent evidentiary hearing held on this matter.

Thank you.

Sincerely,

Melanie A. Bachman
Executive Director

Subject: Docket No. 470

February 24, 2017

Connecticut Siting Council and Executive Director Melanie Bachman

10 Franklin Square

New Britain, CT 06051

Dear Connecticut Siting Council Members,

We would like to thank you for listening to all the information submitted regarding Docket NO. 470 - NTE Connecticut, LLC application for a Certificate of Environmental Compatibility and Public Need for the construction, maintenance, and operation of a 550-megawatt dual-fuel combined cycle electric generating facility and associated electrical interconnection switchyard located at 180 and 189 Lake Road, Killingly, Connecticut.

On Jan 26th at the CSC evidentiary hearing Sean Hendricks the Killingly Town Manager answered questions relating to citizen complaints. Initially Sean indicated there are no complaints regarding the Lake Road industrial area. Residents have complained to the town offices and Killingly Town Council numerous times about the start up noise from Lake Road Generating and noise from truck traffic and noise from Frito Lay. Sean then acknowledged he heard some complaints. Also he must have forgotten about the Lannon Farm report to the Inlands and Wetland Dept. about suffering from ground water and stream water pollution from the Killingly Industrial area. There are at least 400 homes within a mile of the industrial park and the proposed NTE/KEC site. The Alexander Lake area of Killingly would be adversely affected by more noise pollution, air pollution and traffic pollution.

We are waiting to attend a special Killingly Town Council Meeting to discuss NTE deal options. On Jan 29th the newspaper The Bulletin published a special meeting was scheduled for Jan 31st at 7pm. That date was cancelled due to bad weather. Since then Feb 20th was to the new meeting date. That has

been cancelled too. We taxpayers have not seen a copy of the proposed agreement to be discussed. We find this lack of transparency troubling.

The State of Connecticut has agreed to an agenda to reduce dependency on fossil fuel electrical production and emissions following Renewable Portfolio Standards. We support RPS and the Regional Greenhouse Gas Initiative. It's time for renewable energy expansion.

Recently the Forward Capacity Auction was held. The results show there is no need for more gas fueled electrical generating power plants to be built at this time. Without compelling need the residents of Killingly and nearby communities should not be subjected to all the negative effects of another major power plant so close to so many homes.

Sincerely,

Carolyn Johnston and Charles Wilson
